

COUNTIS AM10

Metering of active energy (0 to 9999,9 kWh) for single phase networks until 32A with a total meter with impulses output.

Operation :

Blacklit LCD display for direct reading and metrological LED

Technical characteristics :

- Connection by terminal with section :
 - * flexible cable from 1 to 6 mm²
 - * rigid cable from 1,5 to 10 mm²
- Current measurement direct connection up to 32 A with basic current 10 A .
- Voltage measurement from 230 VAC +/- 20% 50 Hz.
- Pulse output: reed relay with 100 Wh pulse and duration 100 ms.
- For energy, this conforms to IEC 62053-21 on class 1.
- Metrological LED with a constant of 6000 imp/kWh
